CrewAI Flows

Mental Models

Graphs

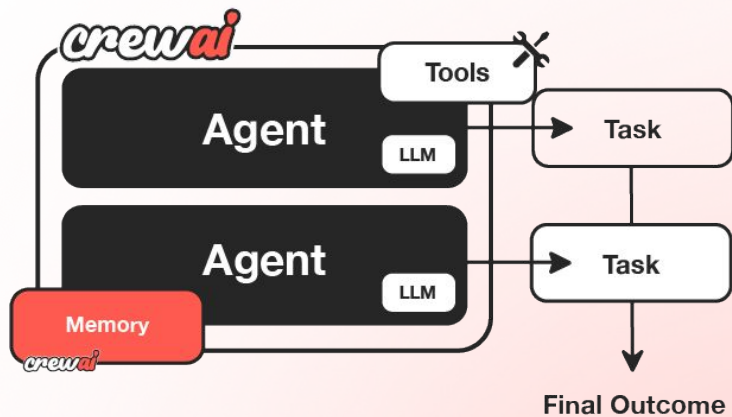

Events

Agents

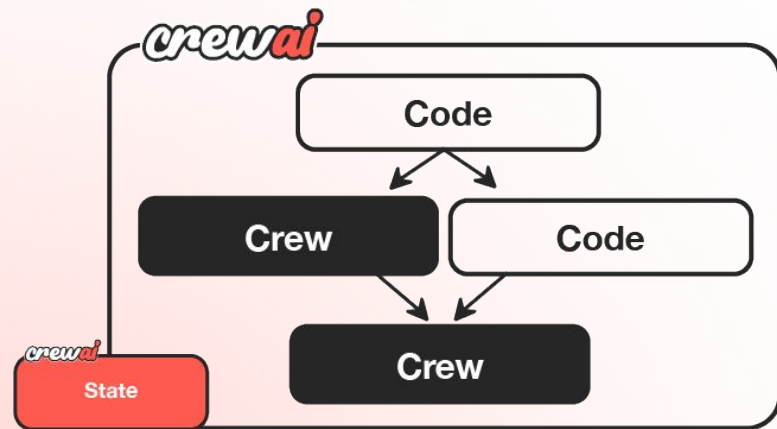

Crew

more agency

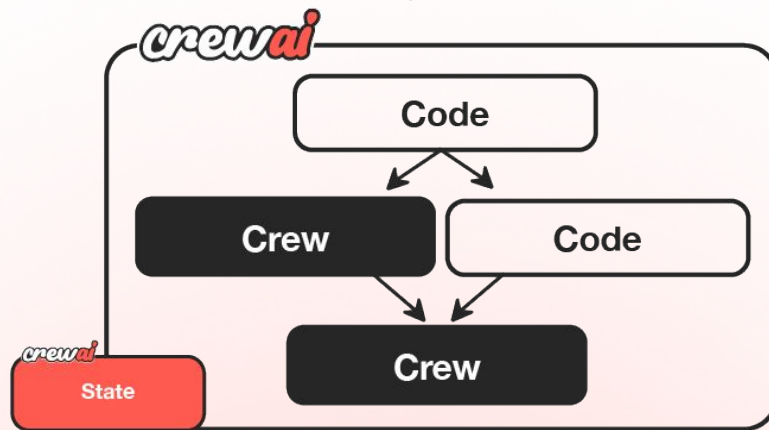

Flows

finer precision

Flows

finer precision

Crews:

- Collaborative agents, more autonomous and dynamic.
Better for exploratory, less deterministic tasks.

Flows:

- Low level, event-driven, control layer.
Ideal for structured, repeatable steps with tight control.

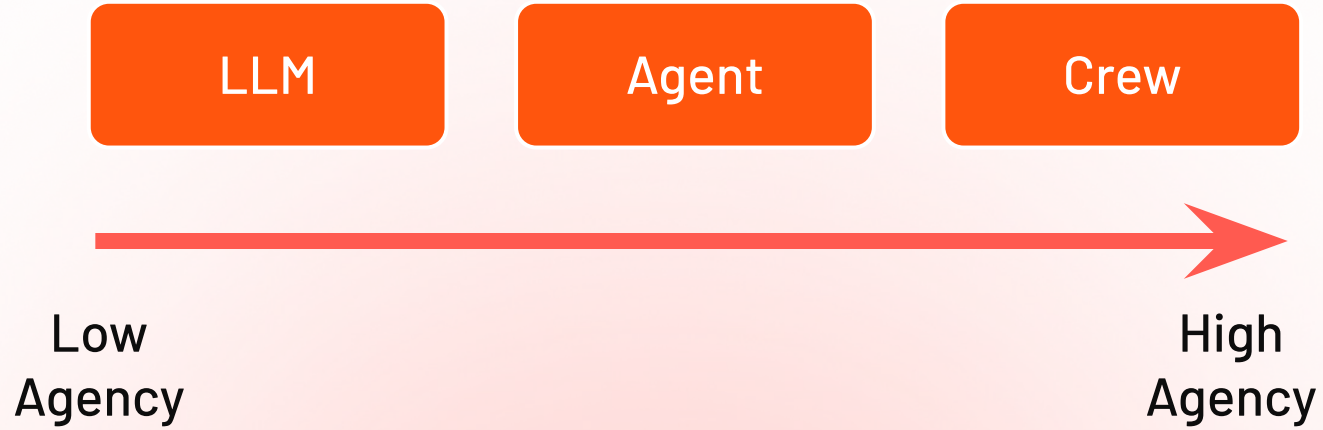

Opt-In Agency Model

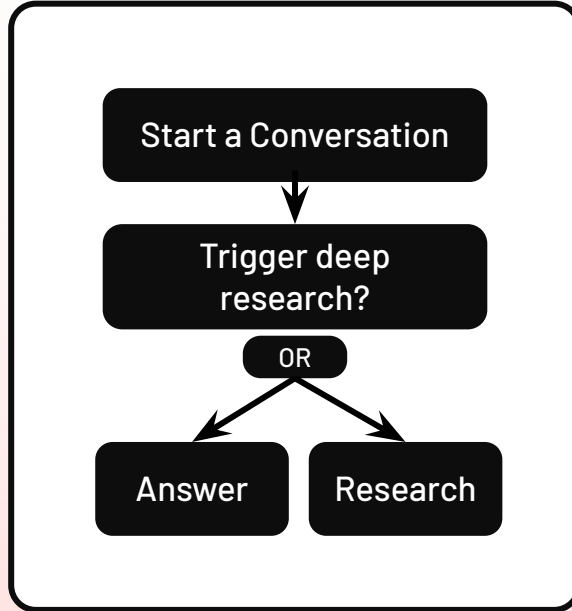

(minimum I can get away with)

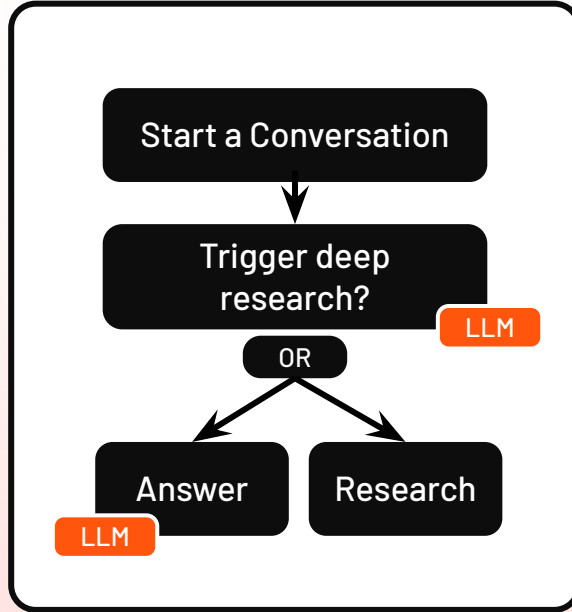

Structured backbone

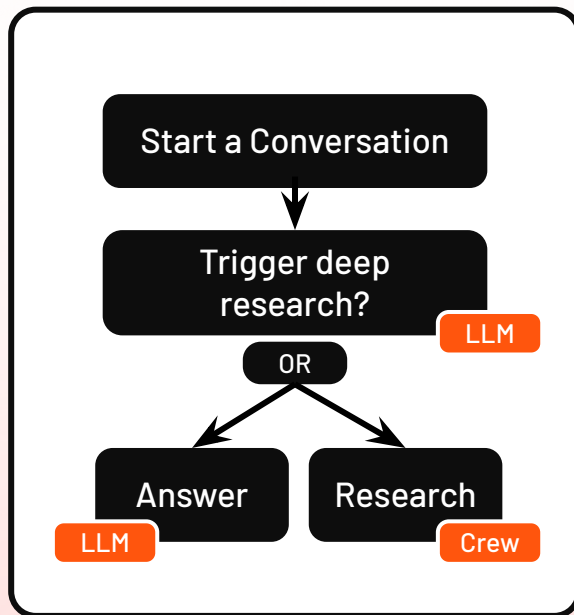

Add agency according to the need

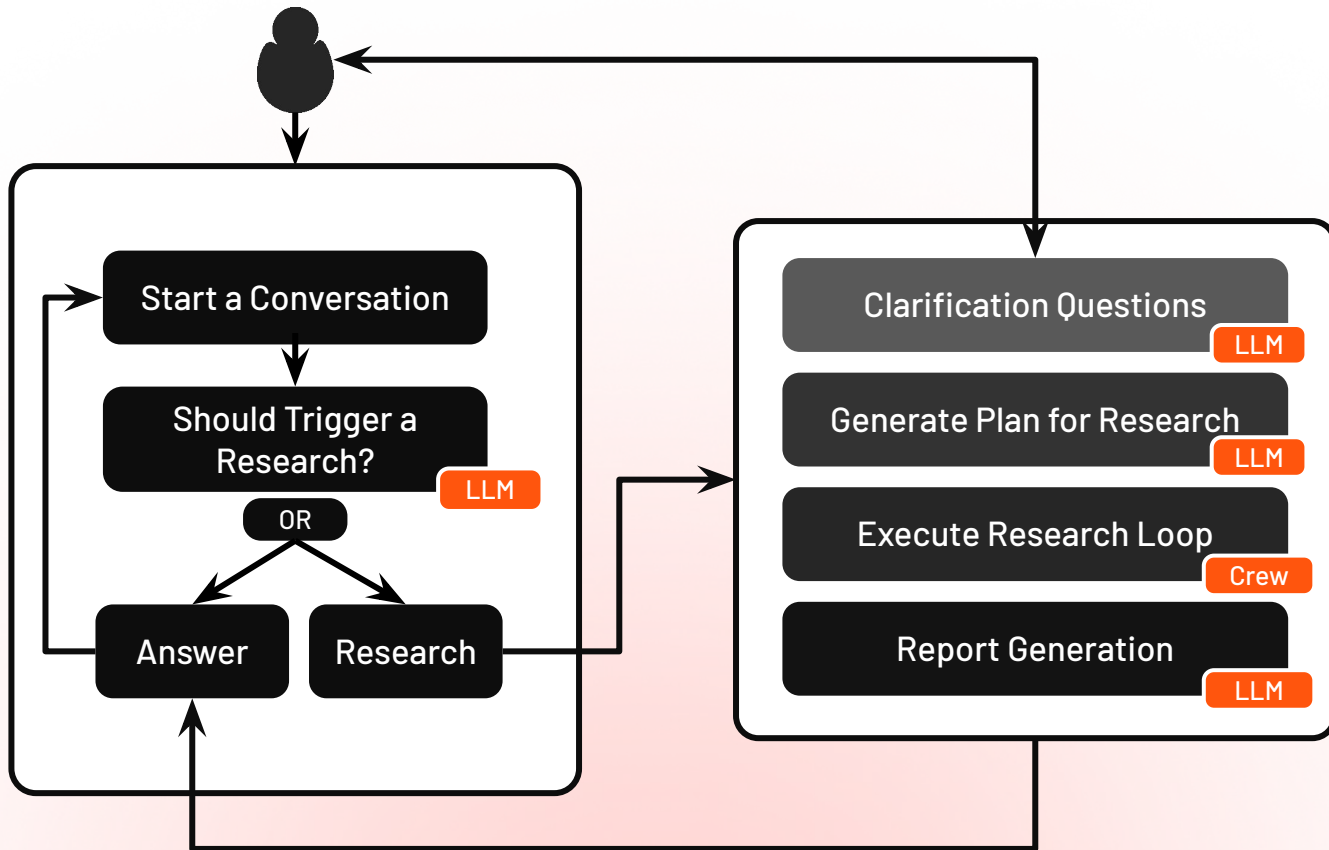

Start with LLM and Expand to full Crew

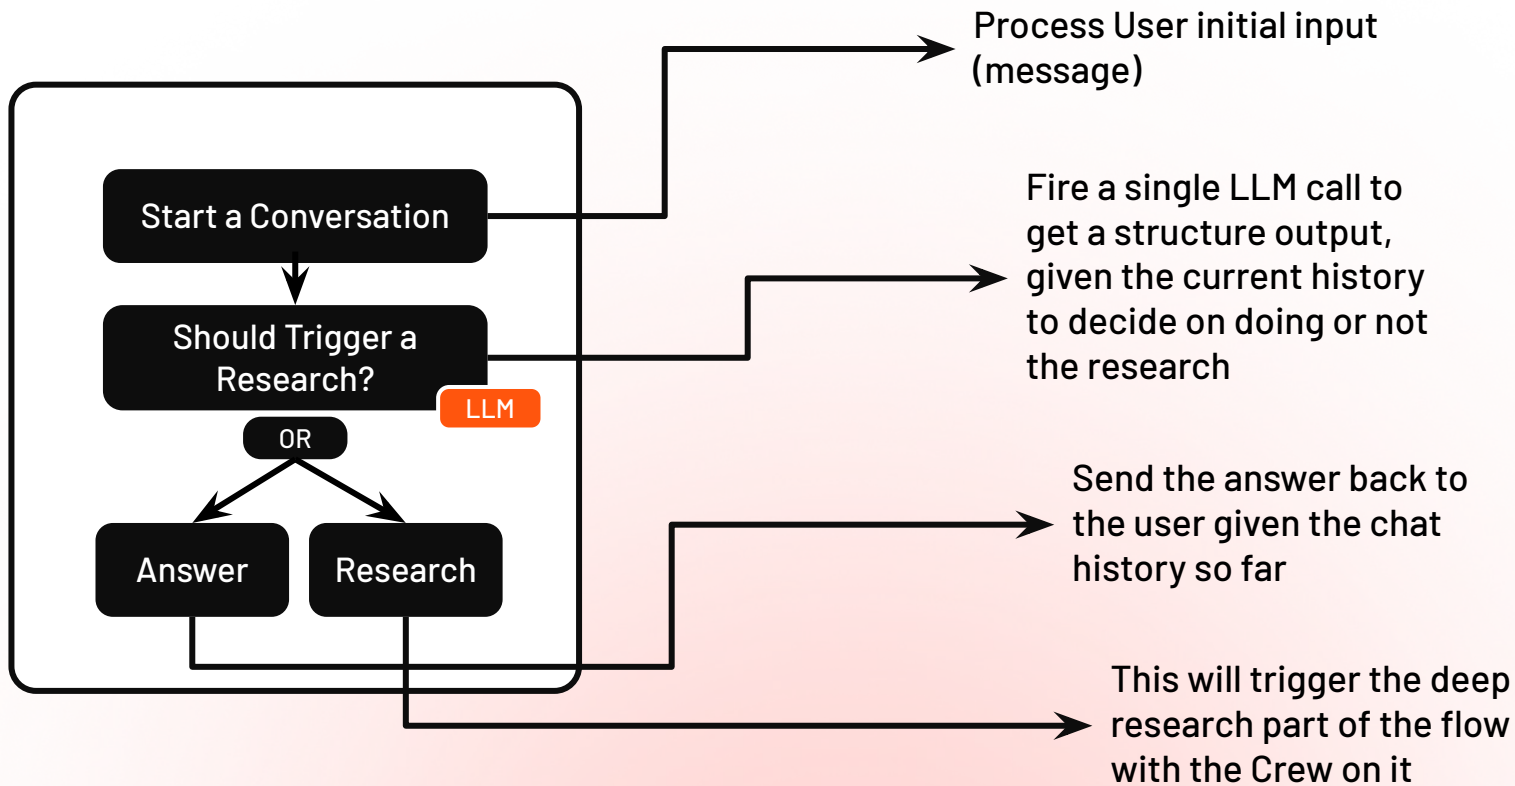

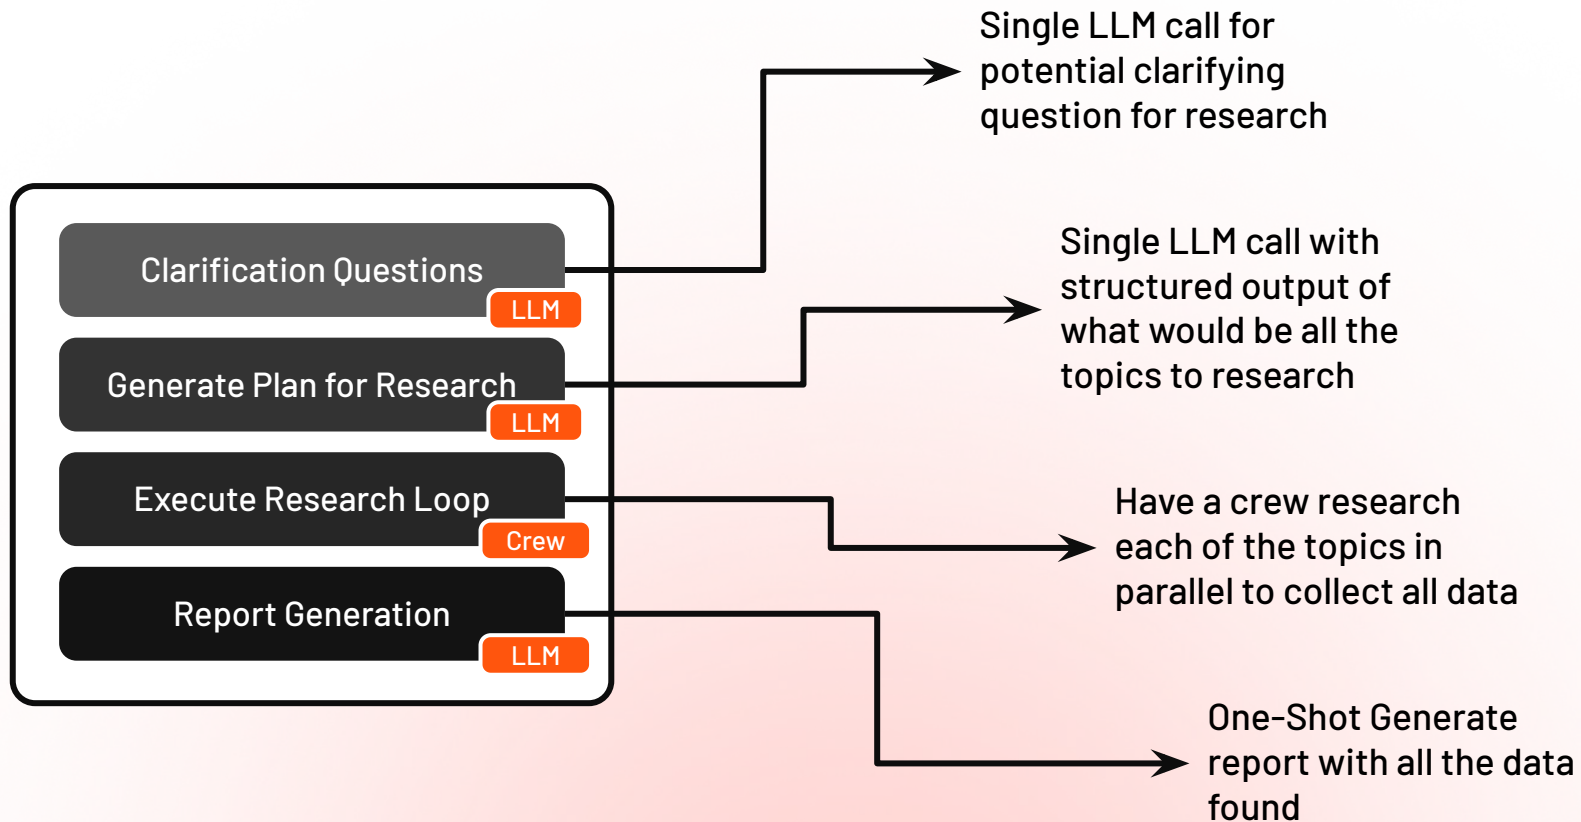

The Major Flows Building Blocks

start, listen, router

The Major Flows Building Blocks

start, listen, router

```
@start()  
def start_conversation(self):  
    print("Starting conversation")
```

The Major Flows Building Blocks

start, listen, router

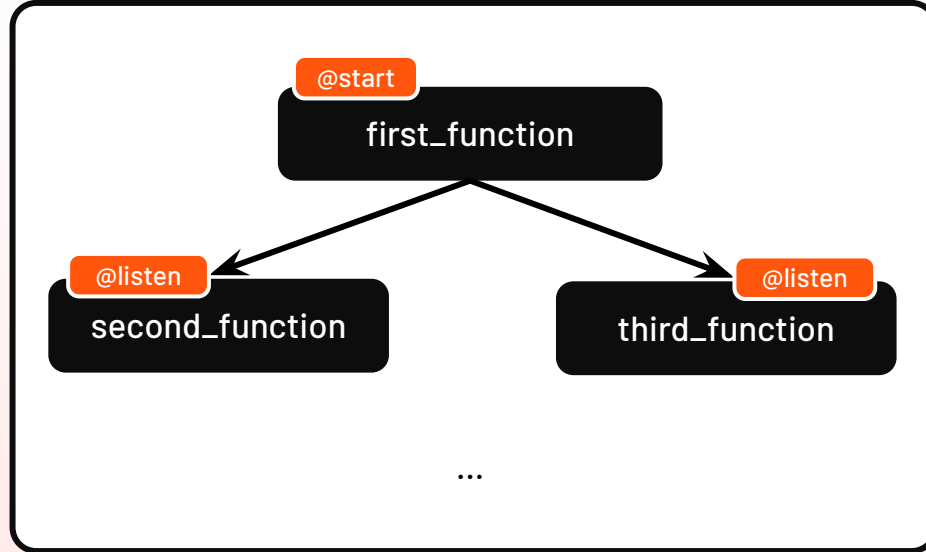

```
@listen(start_conversation)
def trigger_research?(self):
    print("Checking for research")
```

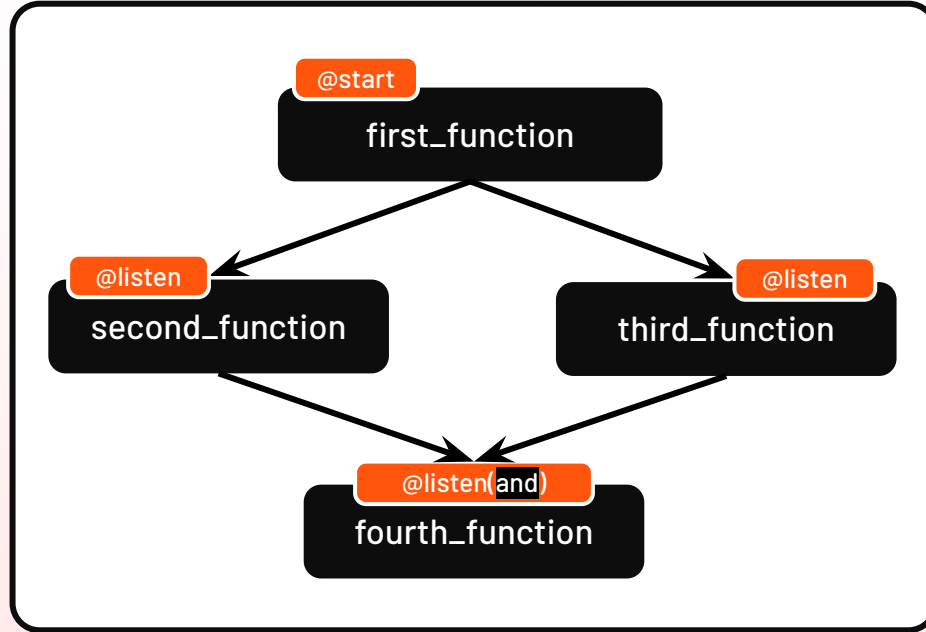

The Major Flows Building Blocks

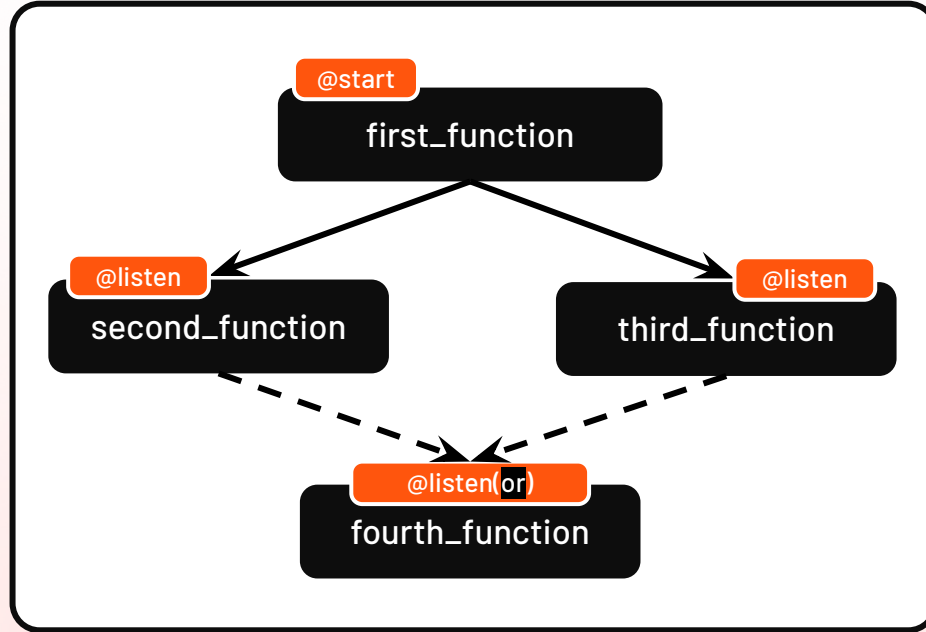

start, listen, router

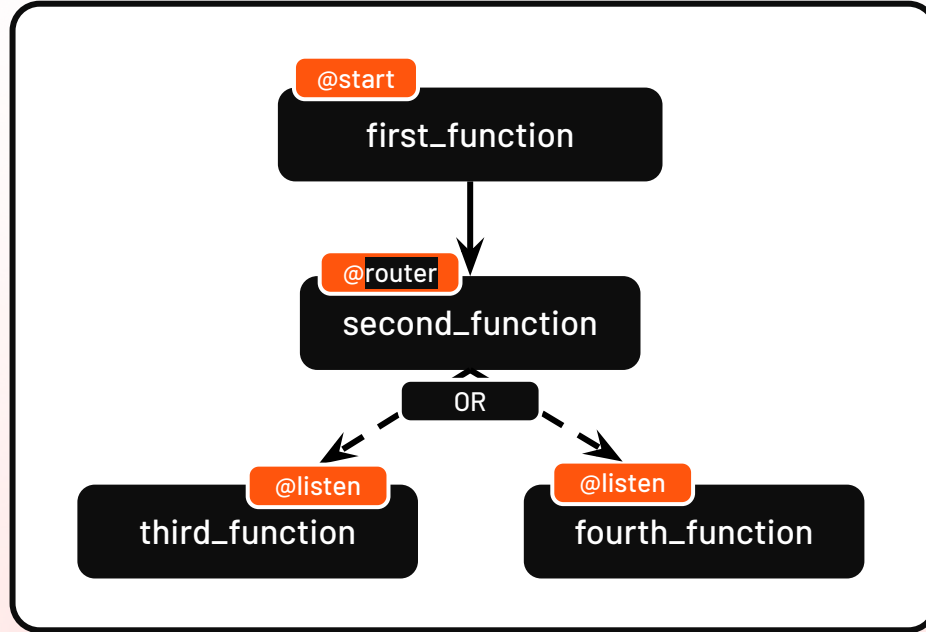

```
@start()  
def start_conversation(self):  
    print("Starting conversation")
```

```
@listen(start_conversation)  
def trigger_research?(self):  
    print("Checking for research")
```

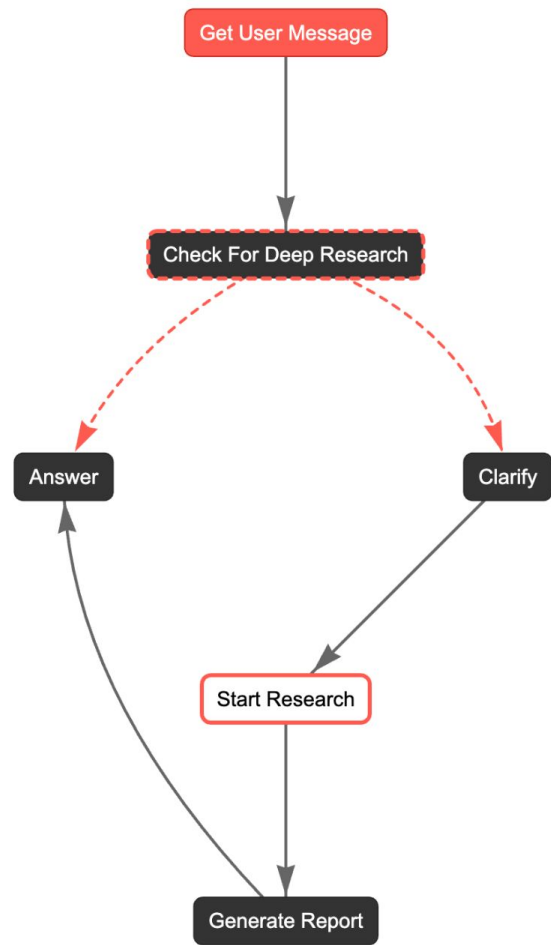

crewai flow plot

```
crewai create flow deep_research
```

```
crewai create flow <project_name>
```

```
